

NEW PRODUCTS 2009

SECTION C - FUSING

January 2009

New From System 96 - *Light Amber* SP 110.4SF

Because of the popularity of earth tones, Amber is one of the most frequently requested translucent glasses these days. To close the gap for those wanting an Amber that's just a bit heartier than Pale Amber, yet not as bold as Medium Amber, Spectrum has produced a rich, golden-toned **Light Amber.**

February 2009

New From System 96 - *Blue Aventurine* SP 138AVSF

This glass is stunning - a deep navy blue comes alive after fusing with embedded vibrant flecks of sparkling metallic flakes.

New COE90 Glass - *Blue Aventurine* BU 1140-30F

This glass is very dense midnight blue with tiny sparkles.
