COLOUR *de* VERRE

NEW MOLDS From Colour de Verre

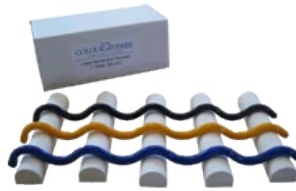

Serpentine Formers Colour de Verre's versatile Serpentine Formers are used to shape rods, stringers, noodles, and glass ribbons into "waves" and other interesting patterns. The resulting shapes can then be used to embellish boxes, plates, platters, sconces, and lamps. The Serpentine Formers come in three sizes: Small (½" wide), Medium (¾"), and Large (1"). All styles are six inches long, and made from ceramic.

The small style makes the tightest, most delicate waves that are great for jewelry and small projects. The medium style creates designs that are great for boxes and plates. The large formers create the largest waves that are great for big projects like platters, panels and large bowls. Glass ribbons (strips) can be made and used to make glass dams (all sizes work well for this). For instructions, download the PDF from our website at: http://www.hollanderglass.ca/newproducts_sg.html

Ginkgo Leaves FUS M0711

Each mold makes six different leaves. There are three designs on front and three on the back. The fill weights for Side A, the side with the "Ginkgo Leaves" text, are 9, 9, and 9 grams. The fill weights for Side B, the side with the copyright text, are 15, 7, and 14. The mold is 5" x 8" x 1.25". Colour de Verre suggests a firing temperature of about 1350°F for COE 96 and 1375°F for COE 90.

Large (5 pcs)

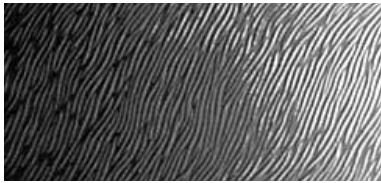

Medium (5 pcs)

Small (6 pcs)

Product Code	Description
FUS M0711	Ginkgo Leaves Mold

Alternative, Economical Pattern Glass Options Are Ideal For Cabinetry & Wrought Iron Applications

CPG 3909 Clear Fur Lite

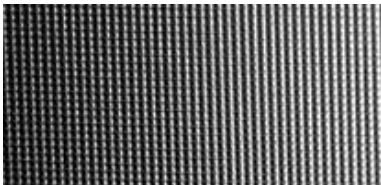

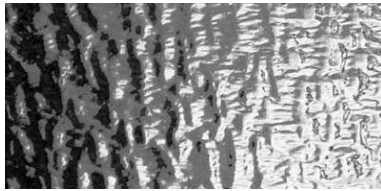

This 4mm glass has a fur-like pattern, similar to that of the ever so popular Chinchilla.

CPG 3901 Clear Granite

This 3mm Granite pattern comes in 48" x 60" factory sheet size and is also available in 20" x 48" bin size sheet.

CPG 3908 Clear Fabric

This pattern consists of tiny squares, very similar to that of Listral (VGL 159), but note that this pattern is a 3mm thick glass.

Product Code	Description	Thickness	Sheet Size
