

NEW GLASS!

VINTAGE GLASS FROM SPECTRUM

Vintage Clear™ Period Reproduction Glass SP A/100VINT

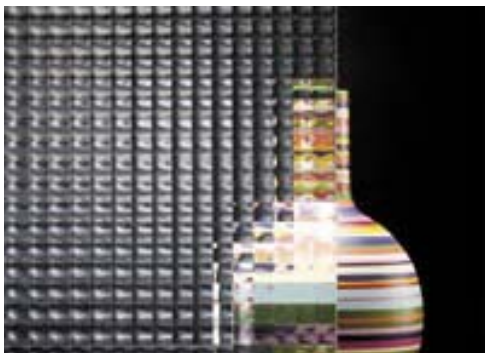

Vintage Clear is Spectrum's first-ever entry into the increasingly popular restoration segment. This refined, double-rolled product is a medium-distortion, 1/8-inch sheet glass simulating common window glass of the early 20th century. Restoration sheet glass products are commonly used in windows, interior doors and furnishings to evoke the look and feel of early American craftsmanship.

Vintage's visual clarity is Spectrum's best ever. Movement in the sheet is subtle but definite, and the surface is glossy but characteristically imperfect. Vintage Clear can also be tempered, to meet safety-glazing standards, where applicable.

Priced significantly less than comparable versions, Vintage Clear is an excellent choice for homeowners and designers working with period styling, revival designs and historical themes.

Vintage Clear is currently stocked in 26" x 72" sheets.

GLAVERBEL
