

## Warranty and Particulars

- 3 year warranty
- 1/5 hp, 110 volt, 50-60Hz
- 5 3/4" diamond-coated stainless steel blade
- on/off switch
- 14 lb.

### The Following Taurus 3 Blades Are Available:

All blades come complete with 2 orange grommits.

#### Standard Blade

##### TL T3-BLADE

Used for all art glass. Good for tile and Marble up to 3/8" thick.

#### Separating Blade

##### TL T3-SEP-B

The blade opens and closes so that you can cut a hole or design on the inside of your material.

#### Dichroic Blade

##### TL T3-DIC

NEW! For cutting dichroic glass. Superfine; won't chip.

#### Slim Blade

##### TL T-SLIM-B

Use where a narrower cut is desired.

#### Mega Blade

##### TL T3-MEGA

Incredible! Cuts thicker plate glass, fused glass, pattern bars etc.

#### Slicer Blade

##### TL T3-SB

For use with the T3 & Super Slicer.

#### The "Super Slicer"

##### TL T-SS

The Super Slicer is a device that holds pattern bars and other small items for slicing in such a way as to allow repeated perfectly parallel and thin cuts to be made. For use with Taurus II<sup>2</sup> or T3 saws.

## Taurus 3 Saw

### TL T3

Easily create intricate designs, patterns, and shapes in all kinds of materials such as glass, tile, stone, plastics, and non ferrous metals with gemini's patented diamond coated blade that:

- **Cuts in all directions.** There are diamonds all around the blade.
- **Grinds as it cuts.** Leaves a smooth edge - requires little/no grinding.
- **Cuts underwater while you stay dry.** Designed so water is deposited around the entire blade continuously and doesn't fly off. The result is a cooler longer lasting blade.
- **Safe to use.** The diamond ring blade is amazing in that it does not cut skin but will cut virtually anything else.
- **Lasts many times longer** than other diamond coated saw blades.
- **Quietly cuts** your glass, tile, stone, and plastic.
- **25% larger work surface.**
- **battery-free light source.**
- **large variety of blades available** for different purposes; particularly popular is Megablade which quickly cuts thicker plate glass, fused glass, pattern bars, and tile.
- Is created with **metal reinforced polycarbonate.**

### Special Feature

The entire working part of the saw snaps out of the water bath and contains its own water so that it can be used as a portable hand saw. This allows you to work the edges of the pieces that are too large to bring to the saw such as float glass, tile, and stone.

### The Following Taurus 3 Accessories Are Available:

**TL T3-DVD** DVD on T3 Saw For Use And Maintenance

**TL 0431\*** Tension Arm Rod
